

Change Management Strategies

The Lever Group LLC

Change Management

- Change management: buzz word or powerful tool?
 - Everyone talks about change management in the context of any and all changes
 - Change is a constant process, how does one manage it?
- The Lever Group believes that change management is about being changed. Instead, we focus on guiding change to achieve strategic goals

Are you prepared for the changes that lie over the horizon?

The Lever Group

- Change management must begin by looking at your organization as a whole
 - Where is your organization now and where *should* this change take it
 - Before any change takes place, your organization must plan in what order the changes will be made
- The Lever Group can help your agency handle its change in the most effective manner possible
 - Once a formal map for change has been created, we will work to leverage current assets
 - We work to help individuals understand and cope with changes
 - By developing incentives for change, we can increase your organizations ability to successfully change to meet mission needs
- We work to plan and harness the power of change, not react to it

Summary

- The Lever Group works to plan and control the forces of change on your organization
- A proper change management strategy results in better services for your clients
- The Lever Group can develop and implement a change management strategy that leaves your organization prepared for the future
