

Enterprise Architecture

The Lever Group LLC

Enterprise Architecture

- Your EA is a strong tool for strategic planning
 - It provides framework for assessing the business need for new investments
 - Helps visualize the often complex relationship between series of investments
- EA is about more than models and maps
 - EA uses your core mission and then builds a technology framework that supports it

A sample EA model

The Lever Group Process

- The Lever Group has extensive experience in creating, revising, and maintaining an Enterprise Architecture
 - We view the EA as a constantly changing document
 - The Lever Group works to integrate Enterprise Architecture at all phases of the CPIC cycle
- We work with our clients to develop an EA that helps management make decisions
 - An EA focuses on technology that meshes with your mission, not necessarily the latest fads
 - When proposed investments make business sense, capital planning becomes easier
 - Integrating your EA into the CPIC process allows for decisions to be made in a more efficient manne

The Lever Group Advantage

- The Lever Group has significant experience providing Enterprise Architecture solutions and improvements
- We work to integrate EA into the planning, risk management, security, and CPIC process
- The bottom line: The Lever Group works to make maximize your budgets through creating a solid Enterprise Architecture
