

IT Governance Strategies

The Lever Group LLC

OMB reporting

- IT Governance centers on funding systems that provide a return on investment
 - Strong governance maximizes mission support for every dollar spent
 - A weak governance structure trickles down into weak project management
- Many agencies have incomplete Governance structures
 - The CPIC is seen as a burden rather than a blessing.
 - Program managers are not often given a choice of which projects receive funding

IT Governance Concerns

- Federal mandates
- Return on investment
- Mission alignment
- Stakeholder service
- Cost performance

The Lever Group Process

- The Lever Group believes that the CPIC process can effectively Govern an IT portfolio
 - Each phase requires an investment to meet a series of hurdles
 - Investments that clear the hurdles should continue to receive funding
 - As new opportunities arise, the entire portfolio must be reevaluated
- The Lever Group acts as an impartial third party helping make key decisions
 - We focus on using performance based solutions to determine a programs investments
 - Our project managers have experience in guiding projects through all phases of the CPIC cycle
 - We maximize the value of required OMB reporting

The Lever Group Advantage

- The Lever Group offers guidance working through the CPIC cycle and provides on site project management for all phases
- We work to strengthen your IT governance to improve investment performance, not hinder growth
- Additionally, The Lever Group works to provide project compliance with all OMB directives
- The bottom line: The Lever Group helps improve IT governance so you can focus more on your mission
